The Existence of God , second edition- corrections.

First list (only needed for copies printed before about 2007)

p172 line minus19,   replace 'allow this to occur' by 'are conducive to this'.

p172 line minus 3,   replace 'ever' by '(at all probably)'

 p186 line minus2, p187 line1, p187 line3, p187 lines 8to9, p187 line13, p187 line minus7

    replace 'fine-tuned' by 'tuned'.

p189 line2 delete ',though weaker'.

p189 lines19to21 delete the whole sentence 'For fine-tuning as such.......'

p189   add a footnote (with the cue to it at the end of
      that paragraph after 'a cogent one'). The footnote should read "If however the
    evolution of human bodies was very improbable given
     the actual laws and initial conditions, but nevertheless
    occurred, then there would be an argument of a different kind to
     the existence of God . This would (like the arguments considered in
     Additional Note 2)be an argument from the fact that the laws and initial
     conditions are one of a small range of such that do not rule out
     the evolution of human bodies, and from the fact that
     nevertheless that evolution occurred even though it was very
     improbable. The conjunction of these two phenomena would be
    much more to be expected if there is a God than if there is no God."
