

counting cells (septation index, % binucleate etc)

Make sure that your image data on the microscope computer is backed up on a usb stick etc.

1. Open umanager. go to

file>open acq data as 5D

choose FOLDER of relevant set of images to analyze

2. to count on RGB stack

image 5D> copy to RGB stack

then

plugins>cell counter

initialize

select counter (8 available)

count by clicking on image

to copy data to excel click on 'results' then copy and paste.
